

approved on a pilot basis. If so, how should a pilot be structured? To gain a realistic assessment of the book, should the pilot include a limited number of securities across a range of the NNM market, or should it include securities representing a substantial portion of the trading market. For example, should the pilot include 250 securities, of which 20 were from the Nasdaq top 100 securities, and the rest were chosen from different quintiles of NNM securities? Or should the pilot comprise 1000 securities including the Nasdaq top 100 securities and the remainder chosen from quintiles of NNM securities? Or would a different pilot be more appropriate? In addition, how long should a pilot last? Would six months, or one year, provide sufficient information to evaluate a pilot? Would a pilot of this length and breadth potentially harm the Nasdaq market on a lasting basis?
