Voice Print Proof of Concept—0960-NEW. SSA provides Internet-based electronic services to the business community in order to conduct business with the Agency. As part of the registration process for these services, SSA uses a negative verification option to allow a business' management to stop SSA from sending a password to a registrant to act on behalf of the business. SSA plans to test the use of voice technology, saving a biometric voice-print, as a positive verification by the business that a registrant is allowed to act on their behalf. This technology is expected to be more secure, less burdensome, faster and provide better customer service than other available options. SSA will initiate a 2-month

Proof of Concept project to test the business community's acceptance of this technology. This is strictly voluntary. SSA will collect the name, phone number and e-mail address of the registrant's supervisor. In addition, SSA may survey both the registrant and the supervisor to gauge their reactions to this new process.
